***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to a computer based education management system, classified in class 434, subclass 362.
- II. Claim 10-30, drawn to a method for computer based education management enabling standardization of evaluation parameters, classified in class 434, subclass 323.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as a computer based education management system that does not require administration of a diagnostic test. See MPEP § 806.05(d).
